The HazCat® Chemical Identification System identifies and categorizes virtually any spilled material in the field... quickly and economically.

Originally developed for emergency responders with limited chemical experience, the HazCat® System is easy to use, yet sophisticated enough for demanding applications.

"HazCat®... the only patented system designed for hazardous materials emergency response, site remediation and the hazardous materials transportation and disposal industry."

HazCat®/WMD Workshop: Mar. 28-Apr. 1, 2005 Farmington, UT

NEW WMD Identification Workshops

The ability to quickly and safely identify unknown Radiological, Biological & Chemical Weapons is essential for emergency preparedness.

Fortunately, **HazCat® WMD Identification Workshops** provide students with the skills necessary to respond and make informed decisions regarding the safe and effective handling of WMD Agents.

"The HazCat Workshop was the best HAZMAT class I've ever had—maybe the best class ever!"

- HazCat Workshop Student

Who should take this workshop?

HazCat® Chemical Identification Workshops are designed for emergency response personnel and hazardous materials professionals.

All materials are provided, including a fully illustrated manual. Students receive personal, detailed instruction from certified HazCat instructors emphasizing:

- ☐ Safety: Proper procedures for handling toxic, flammable, and reactive substances.
- ☐ Case Histories: Students learn from actual emergency incidents and real-world hazardous materials operations.
- ☐ Confidence: Students work with the actual hazardous materials likely to be encountered in the field.

WMD agents are more toxic than hazardous materials normally encountered by responders. Early identification of the hazard is critical to ensure the safety of both victims and responders. By rapid field identification, normal operations can resume in a timely manner.

HazCat® is a registered trademark of HazTech Systems, Inc.

Schedule and Registration Information

Where...

Davis County Environmental Health
151 S. 1100 West
Farmington, UT 84025

When...Time: 8:30 am to 5:00 pm

Day 1: Basic HazCat
Day 2: Understanding Inorganic Materials
Day 3: Understanding Organic Materials
Day 4: Understanding Mixtures/WMD
